The dying process usually begins well before death actually occurs, and understanding this process can sometimes help you recognize when your loved one is dying. There are changes that take place physically, behaviorally, and psychologically in the journey towards death, that are signs that the end of life may be nearing.

## **How to Recognize When Your Loved One Is Dying**

Applications of dying patients who sometimes, decades later in their old age, moan and groan and cry have a lot of somatic complaints which we cannot understand medically. When we talk to these people, we see that they have a peculiar sense of guilt; they feel that they have committed a crime and they have to be punished before they die. These patients suffer far beyond our medical understanding.
