PDF. Towards efficient inductive synthesis from input/output examples.

Algorithmic Learning Theory | SpringerLink
Algorithmic learning theory is a mathematical framework for analyzing machine learning problems and algorithms. Synonyms include formal learning theory and algorithmic inductive inference . Algorithmic learning theory is different from statistical learning theory in that it does not make use of statistical assumptions and analysis.

Algorithmic learning theory - Wikipedia
The book is based on Introduction to Machine Learning courses taught by Shai Shalev-Shwartz at the Hebrew University and by Shai Ben-David at the Univer- sity of Waterloo.

Learning Theory is a research field devoted to studying the design and analysis of machine learning algorithms. In particular, such algorithms aim at making accurate predictions or representations based on observations.
