

encyclopedia of chemical processing pdf

Photographic processing or development is the chemical means by which photographic film or paper is treated after photographic exposure to produce a negative or positive image. Photographic processing transforms the latent image into a visible image, makes this permanent and renders it insensitive to light.. All processes based upon the gelatin-silver process are similar, regardless of the film ...

Photographic processing - Wikipedia

In organic chemistry, phenols, sometimes called phenolics, are a class of chemical compounds consisting of a hydroxyl group (-OH) bonded directly to an aromatic hydrocarbon group. The simplest of the class is phenol, $\text{C}_6\text{H}_5\text{OH}$. Phenolic compounds are classified as simple phenols or polyphenols based on the number of phenol units in the molecule.
