

evolutionary science of human pdf

Evolutionary psychology is a theoretical approach in the social and natural sciences that examines psychological structure from a modern evolutionary perspective. It seeks to identify which human psychological traits are evolved adaptations – that is, the functional products of natural selection or sexual selection in human evolution. Adaptationist thinking about physiological mechanisms ...

Evolutionary psychology - Wikipedia

Evolution is change in the heritable characteristics of biological populations over successive generations. These characteristics are the expressions of genes that are passed on from parent to offspring during reproduction. Different characteristics tend to exist within any given population as a result of mutation, genetic recombination and other sources of genetic variation.

In invertebrates, at least, taste has a social function. For example, *Drosophila* males use taste to differentiate between females and males, as well as to recognize mating status and activities of individual females 102, 103. Whether taste plays a social communication role for vertebrates remains to be determined.

An Evolutionary Perspective on Food and Human Taste

Name. "Muller's ratchet" is the name of a particular population genetical model that describes a situation, where many slightly harmful DNA changes occur repeatedly in a population of individuals.

The principle of Muller's ratchet – evolution.ws

Just under half of Britons accept the theory of evolution as the best description for the development of life, according to an opinion poll. Furthermore, more than 40% of those questioned believe that creationism or intelligent design (ID) should be taught in school science lessons. •
