Introduction. In Einstein's general theory of relativity, gravity is treated as a phenomenon resulting from the curvature of spacetime. This curvature is caused by the presence of mass. Generally, the more mass that is contained within a given volume of space, the greater the curvature of spacetime will be at the boundary of its volume. As objects with mass move around in spacetime, the ...

Gravitational wave - Wikipedia

Upper-Division Writing Requirement: Physics majors are required to satisfy the upper-division writing requirement by completing PHYSICS 194 with a grade of C or better, followed by PHYSICS 121W with a grade of C or better.. Sample Program— Physics Core Curriculum

Alumnus endows scholarships. Rick Rauch with early days of gravitational wave-detection research

Department of Physics & Astronomy

The Department of Astronomy offers a major and a minor in astronomy. In addition, students may pursue astronomy as part of the LAS Major in Computer Science and Astronomy.. The major in astronomy, administered by the Department of Astronomy, is based upon both a broad and an in-depth exploration into astronomy and allied disciplines, and is an excellent way to gain a general science education.

Astronomy < University of Illinois

General relativity is a theory of gravitation that was developed by Albert Einstein between 1907 and 1915. According to general relativity, the observed gravitational effect between masses results from their warping of spacetime.. By the beginning of the 20th century, Newton's law of universal gravitation had been accepted for more than two hundred years as a valid description of the ...

Introduction to general relativity - Wikipedia

The School of Physics, Trinity College Dublin, congratulates Mike Coey on the Max Born Medal and Prize. This is a prestigious award by the Institute of Physics and the German Physical Society (DPG) made on alternate years to a physicist working either in Germany or in Great Britain or Ireland.....
