Mars Science Laboratory (MSL) is a robotic space probe mission to Mars launched by NASA on November 26, 2011, which successfully landed Curiosity, a Mars rover, in Gale Crater on August 6, 2012. The overall objectives include investigating Mars' habitability, studying its climate and geology, and collecting data for a manned mission to Mars. The rover carries a variety of scientific ...

A medical laboratory or clinical laboratory is a laboratory where clinical pathology tests are carried out on

clinical specimens to obtain information about the health of a patient to aid in diagnosis, treatment, and prevention of disease. Clinical Medical laboratories are an example of applied science, as opposed to research laboratories that focus on basic science, such as found in some ...

### **Medical laboratory - Wikipedia**

Enhanced Reliability. We drive the instrumentation and specimens to their limits of acceptability for each and every analyte. Our process includes the identification of the sources of potential errors and quantification of the potential errors to ensure accuracy, precision, analytical sensitivity and specificity, interferences, and the reportable range for each analyte.

The laboratory performs research in a close co-operation with the Paul Scherrer Institute (PSI) in the field of single- and multi-phase flows in nuclear power installations. Beside applied topics, studies of fundamental thermal fluid-dynamic phenomena are part of the research activities. New test facilities are planned, which will be equipped with high-resolution two-phase instrumentation.
