

lasers in microelectronic manufacturing pdf

Laser cutting is a technology that uses a laser to cut materials, and is typically used for industrial manufacturing applications, but is also starting to be used by schools, small businesses, and hobbyists. Laser cutting works by directing the output of a high-power laser most commonly through optics. The laser optics and CNC (computer numerical control) are used to direct the material or the ...

Laser cutting - Wikipedia

Radar is a term derived from the U.S. Navy acronym radio Detection And Ranging. Using radio waves and microwaves, radars can detect objects and determine range, altitude, direction, or speed.

A technical standard is an established norm or requirement in regard to technical systems. It is usually a formal document that establishes uniform engineering or technical criteria, methods, processes, and practices. In contrast, a custom, convention, company product, corporate standard, and so forth that becomes generally accepted and dominant is often called a de facto standard.
