How do you model a software system? This free course, Modelling object-oriented software an introduction, will help you to work through the processes necessary to produce a conceptual model, by analysing the requirements document to identify classes and associations appropriate for modelling the system domain, together with their respective attributes and multiplicities.

Modelling object-oriented software – an introduction

The FMA instruction set is an extension to the 128 and 256-bit Streaming SIMD Extensions instructions in the x86 microprocessor instruction set to perform fused multiply-add (FMA) operations. There are two variants: FMA4 is supported in AMD processors starting with the Bulldozer architecture. FMA4 was realized in hardware before FMA3. FMA3 is supported in AMD processors starting with the ...
