This is a superb book. If you only buy one book for your own or your departmental library this year, this would be an excellent choice...I thoroughly recommend this book to teachers, mathematics educators, students and anyone interested in the visual side of mathematics.

Math Made Visual: Creating Images for Understanding

Welcome to my math notes site. Contained in this site are the notes (free and downloadable) that I use to teach Algebra, Calculus (I, II and III) as well as Differential Equations at Lamar University. The notes contain the usual topics that are taught in those courses as well as a few extra topics that I decided to include just because I wanted to.

CSS Positioning. HTML tables can be used to do much of the positioning required by math, but the code

required to do this can be very cumbersome, so that the bulk of the code is about arranging the formula as a table, rather than about the formula and its parts.
