An analysis of global statistics shows a substantial increase in flood damage over the past few decades. Moreover, it is expected that flood risk will continue to rise due to the combined effect of increasing numbers of people and economic assets in risk-prone areas and the effects of climate change. In order to mitigate the impact of natural hazards on European economies and societies ...

Introduction. The concept of precaution is of great relevance in environmental regulation in many countries. Despite the somewhat vague nature of the legislation, some attention has recently been given to the precautionary principle within frameworks and models of economic interpretation and their application.
