Medical Image Format FAQ - Part 8 - d Clunie

Medical imaging is the technique and process of creating visual representations of the interior of a body for clinical analysis and medical intervention, as well as visual representation of the function of some organs or tissues (). Medical imaging seeks to reveal internal structures hidden by the skin and bones, as well as to diagnose and treat disease.

Medical imaging - Wikipedia

Deep learning algorithms, in particular convolutional networks, have rapidly become a methodology of choice for analyzing medical images. This paper reviews the major deep learning concepts pertinent to medical image analysis and summarizes over 300 contributions to the field, most of which appeared in the last year.

A survey on deep learning in medical image analysis

The 21st Century Cures Act (12/13/2016) amended the definition of "device" in the Food, Drug and Cosmetic Act to exclude certain software functions, including some described in this guidance ...

In computer vision and computer graphics, 3D reconstruction is the process of capturing the shape and appearance of real objects. This process can be accomplished either by active or passive methods. If the model is allowed to change its shape in time, this is referred to as non-rigid or spatio-temporal reconstruction.

Objectives. The primary objective of IJISDC is to provide a framework for discussion and dissemination of knowledge in the area of intelligent systems design and its importance in the changing scenario of technology development. It is a medium to highlight research contributions on a global scale. The outcome is a platform facilitating discussion, documentation and dissemination of know-how ...
